months previous. In fact, until very re-cently there has been scarcely at a galace able rumor from any section of the South struct the last of May. Now, however, from parts of Georgia and South Carolina we are receiving proofs of injury to the crops from drought. Corn has been or dently injured and cotton to the crops from drought. Corn has been or dently injured and cotton to the first warm where it was highly manufact. This want is rain; however, has not extended over the outers States named, but has been looked and by hoos forminated. within a few days in some sections by co ous showers. What is the extent of the arm done we cannot now tate. The ammentred paston can bear foug dry

of scattering worms or caterpillars. There is, however, little to be feared from There is, however, little to be feared from this source as long as the weather opportunes of the long as the weather opportunes of the long as the weather opportunes of the long and the rain would be likely to breed them and the new growth feed them until they would become a formidable army, as was the case last season. But as yet we see little to fear from their appearance. With the exceptions noted above, all our reports this week have continued favorable. The injury to action trains the from their possess.

The injury to action (run the food in Terms seproved to be very limited, while from the other portions of that State and from Louisiana, Mississippl and the West our advices are all highly satisfactory. We notice that the Agricultural Bureau states that statistics which it has collected show the area in cotton this year to be: Acres.
Allowing for errors and Official 2,000,000 Would leave the acreage at .... 6,000,000

This would give a crop, if we estimate one-half bale to the acre, of 3,000,000 bales, or. If we take 250 pounds to the acre, of the school of
